ABOUT THE CONFERENCE

The conference 'New Frontiers in Breast and Thoracic Malignancies' is jointly organized by P. D. Hinduja Hospital & Medical Research Centre, Mumbai and King's College, London. The focus of the conference is to address some of the controversial issues and present day challenges in the management of breast, lung and esophageal cancers.

The benefits of attending: An exchange of ideas in the management of breast and thoracic malignancies with leading oncologists from India and King's College, London.

The conference will have interactive multi-disciplinary sessions, debates, case discussions and panel discussions on various contemporary issues.

Who should attend: Practicing oncologists and postgraduate students in medical, surgical & radiation oncology.

Venue: 4th Floor, Conference Hall, PD Hinduja Hospital & Medical Research Centre, Veer Savarkar Marg, Mahim, Mumbai - 400016.

Registration fee: Delegate: ₹. 3000/- | Postgraduate students: Free but registration is compulsory.

To Register: Online: <https://www.hindujahospital.com/onconference/>

For details: Call Dr. Preeti - +91 9820539021 or email at oncoconference@hindujahospital.com

ABOUT P. D. HINDUJA HOSPITAL & MEDICAL RESEARCH CENTRE

PD Hinduja Hospital & Medical Research Centre, founded in 1951, is a leading multi-specialty tertiary care hospital, committed to its mission of providing "Quality Healthcare for All".

The Hospital lays emphasis on development of Clinical Practice, Academics and Research. The hospital is accredited and certified by NABH, CAP, HACCP and ISO. It has always been an early adopter of technology, being the first in the country to have Gamma Knife, Digital broadband MRI and many more.

The oncology service is a multidisciplinary approach of surgical, medical and radiation oncology ably supported by advanced imaging, pathology and nursing care. The medical oncology caters to all tumors, has day care and stem cell transplant facilities. The radiation oncology with state of the art "Truebeam" linear accelerator providing precision treatment including IMRT, SBRT and advanced 4D treatment. The surgical oncology has expert surgeons treating tumors in all subsites with the goal of organ preservation, reconstruction and rehabilitation where indicated.

In line with one of its guiding principles "Work to Give", the hospital runs the "Serve with Passion" rural health programme, under which free healthcare services are provided to the tribal areas in Maharashtra and Dadra Nagar Haveli.

ABOUT KING'S COLLEGE, LONDON

Founded in 1829 by King George IV and the Duke of Wellington (then Prime Minister), King's College London is recognised today as a world-leading university, dedicated to the advancement of knowledge, learning and understanding in the service of society. With 12 Nobel Laureates, it is the hub of a global network of strong academic connections and collaboration, with prestigious international partnerships within and across disciplines – scientific and medical, social and creative.

King's College London is one of the top 20 universities in the world and one of England's oldest. Located in the heart of London, it has an outstanding reputation for world-class research and teaching. King's has more than 27,600 students (of whom nearly 10,500 are graduate students) from some 150 countries, and some 6,800 staff all of whom span eight faculties that include the Faculty of Life Sciences and Medicine, The Florence Nightingale Faculty of Nursing and Midwifery and the Institute of Psychiatry, Psychology and Neuroscience. King's College London is the largest centre for the education of doctors, dentists and other healthcare professionals in Europe. Within the Faculty of Life Sciences & Medicine, the King's College London GKT (Guy's, King's College and St Thomas's Hospitals) School of Medical Education is responsible for the education and training of a thriving community of 2,200 undergraduate students.
