# THE KIDNEY BIOPSY: AN UPDATE

It is indisputably acknowledged that the findings on the kidney biopsy influence clinical management decisions in renal disease. Kidney biopsy interpretation can be challenging & opinion from a pathologist who understands it's nuances & complexities is much valued by the nephrologist.

The aim of this update is to provide a perspective on kidney biopsies in a structured manner and will be conducted by renowned nephropathologists & nephrologists. This course will also help create awareness about recent developments in nephropathology that impact outcome.

Practising histopathologists, pathology trainees, practising nephrologists & nephrology trainees will find this academic event useful & thought provoking.
