

Hinduja Hospital Launches **3D DIGITAL MAMMOGRAPHY** With Advanced Technology

HINDUJA HOSPITAL
Live to Give Here

Hinduja Hospital is the first private hospital in the South-east Asia and the second hospital in the country to offer 3D Digital Mammography services.

This latest and most advanced offering has numerous benefits for the patient

- ✂ The patient's exposure to radiation and time taken for mammo is reduced by 30 – 40%.
- ✂ The visualization is better and problem of overlapping breasts is resolved
- ✂ Chances of repeat & Multiple Mammos is reduced substantially.
- ✂ Biopsy can be done simultaneously eliminating number of patient visit.
- ✂ Effective in denser and younger breasts.
- ✂ 3D visualization & tomosynthesis ensures even smaller lesions are detected.
- ✂ Painless, single prick, precise biopsy.
- ✂ Most digital mammos actually digitalise analogue images. This 3D Mammo is a true digital mammo which gives better image from multiple angles with the option to magnify desired areas.
- ✂ The prone table for biopsy reduces pain; is more precise and much less invasive.
